A Good Cook

Ought to have a good variety of dishes, pots and pans and mixing things, to do her cooking with.

In these days of labor saving contrivances, it is a pity that any woman should be without all the utensils that make cooking both easy and pleasant.

No woman would be without any of the things she needs in this line, if she fully realized for how little money they can be bought.

Not everyone knows that we carry a large stock of such articles, yet such is the case. Those who do know it know also that we sell kitchen things, as we do all other goods, at the lowest of low prices.

Our large transactions make it possible for us to do this, since through our connection with the Syndicate Trading Company of New York we are able to purchase goods of all kinds at lower rates than can be done by dealers who have not the advantage of such connection.

For all kitchen articles, then, such as mixing bowls, and spoons, egg beaters, flour sieves, chopping bowls, trays and knives, pie plates, pudding dishes, bread and cake tins, tea kettles, tea pots, roasting pans, etc., etc., visit our kitchen furnishings department, in our basement.

You will find the assortment the large and best, and the prices the lowest in this region.

SOUPS.

Clam Chowder.

One quart clams, salt and pepper to taste, one quart sliced potatoes, 2 small onions, 8 crackers, 1 quart water, 1 quart milk. Wash clams thoroughly in the quart of water and strain the liquid through a muslin. Boil potatoes in this until cooked. Slice onions and fry in butter until a golden brown, and add to the potatoes while they are cooking. Add the milk and spread over the top the crackers which have previously been split and softened in cold salted water, placing a piece of butter size of a walnut on each half. Cook slowly twenty minutes. Then add the clams and boil up once.

Potato Soup.

Pare 6 potatoes and let them simmer in a pint of water with 1 onion sliced. When thoroughly cooked strain through a sieve and add a pint of milk; salt to taste. When hot stir in 1 egg well beaten. Serve immediately.

Corn Chowder.

Fry 2 or 3 slices fat salt pork (one onion if you wish). Strain into a kettle; add one quart sliced potatoes and 1 quart boiling water. Cook till potatoes are done, add one quart hot milk, 1 can of corn (or one quart grated fresh corn), and bring to a boil. Add three tablespoonfuls butter, salt and pepper.

Mock Bisque Soup.

1 quart can tomatoes, 3 pints milk, 1 large table spoonful flour, butter the size of an egg, pepper and salt to taste, 1 scant teaspoonful soda. Put the tomato on to stew, and the milk in a double kettle to boil, reserving however half a cupful to mix with flour. Mix the flour smoothly with this cold milk, stir into the boiling milk, and cook ten minutes. To the tomato add the soda; stir well and rub through a strainer that is fine enough to keep back the seeds. Add butter, salt and pepper to the milk, and then the tomato. Serve immediately. If half the rule is made, stir the tomato well in the can before dividing, as the liquid portion is the more acid.

Potato Soup.

1 quart milk, 6 large potatoes, one stalk celery, 1 onion and one table spoonful butter. Put milk to boil with onion and

celery. Pare potatoes and boil thirty minutes. Turn off the water, and mash fine and light. Add boiling milk and butter, and pepper and salt to taste. Rub through a strainer and serve immediately. A cupful of whipped cream, added when in the tureen, is a great improvement. This soup must not be allowed to stand, not even if kept hot. Served as soon as ready, it is excellent.

FISH.

Fish a la Creme.

4 pounds of fish (haddock preferred), 1 pint cream sauce, 1 cup cracker crumbs, moistened in $\frac{1}{3}$ of a cup of melted butter. Clean the fish, cook in boiling salted water (or steam) till the flesh separates. When cool remove the skin and bones, and pick apart in flakes. Make a rich white sauce. Put a layer of fish in a dish suitable for serving. Cover with the sauce, letting the fish soak up all it will; then arrange another layer of fish and sauce until all is used. Spread the moistened crumbs over the top, set in the oven and bake till the crumbs are brown.

White Sauce for Fish.

1 pint milk, 2 tablespoonfuls butter, 2 heaping tablespoonfuls flour, salt and pepper.

Heat the milk over hot water. Put the butter in a granite saucepan and stir until it melts and bubbles. Add the dry flour, and stir quickly till well mixed. Add the milk slowly, and stir vigorously till well mixed and perfectly smooth.

Cusk.

Mince 2 lbs. salt codfish; 1 quart cream or rich milk. Mix 4 tablespoonfuls corn starch with $\frac{1}{2}$ cup butter, and stir into the boiling milk. Add the juice of a small onion (if desired), a little parsley, salt and pepper. Cover with buttered crumbs, and bake till brown.

Fish Hash.

The same mixture as above, cooked in a little salt pork fat till brown, and turned out like an omelet.

Fish Souffle.

Prepare as above; add two tablespoonfuls of cream and two beaten eggs. Bake in a buttered dish.

WORCESTER, Mass.

Salt Fish Balls.

1 cup raw salt fish, 2 cups potato, 1 teaspoonful butter, 1 egg well beaten, salt.

Pick the fish in pieces and free from bones. Cut the potatoes in small pieces. Boil together, till potatoes are soft. Drain off all the water; mash and beat the fish and potatoes until very light. Add the butter, salt, and a little pepper. When slightly cool add the egg. Shape in a tablespoon without smoothing much, slip them off into a basket, and fry in *smoking hot* lard or cottolene (I prefer the latter) one minute. Fry only five or six at a time, as more will cool the fat. The fat should be hot enough to brown a piece of bread while you count forty.

MEATS.

Meat Souffle.

1 pint cooked meat finely chopped, 1 pint cream sauce, 4 eggs, 1 teaspoonful chopped parsley, 1 teaspoonful onion juice, salt and pepper to taste. Stir meat and seasoning into the boiling sauce; cook two minutes, add the yolks of the eggs well beaten, and set away to cool. When cold, add whites beaten to a stiff froth. Bake in a buttered dish half an hour. Serve immediately.

Croquettes.

1 solid pint chopped chicken or mixed meats, 1 tablespoonful salt (scant), $\frac{1}{2}$ teaspoonful celery salt, 1 salt-spoonful pepper (black or white), 1 teaspoonful onion juice, 1 table-spoonful lemon juice, 1 table spoonful chopped parsley, 1 egg, 1 pint cream sauce.

For the sauce scald 1 pint milk, cream or stock. If milk is used add 2 tablespoonfuls butter, if cream or stock, 1. Cook the butter and 2 heaping tablespoonfuls flour until smooth; add the boiling liquid slowly. Stir constantly until smooth and of the consistency of paste. Mix with the seasoned meat. When cold, shape, roll in fine bread crumbs, and fry in a wire basket in boiling fat. They will fry better if shaped and rolled several hours before frying. The fat should be hot enough to brown a piece of bread while counting forty.

Beef-steak Loaf.

4 lbs. chopped raw beef (the round is best), 8 pounded crackers, 1 cup sweet milk, piece of butter the size of an egg,

3 lbs. of tomato peeled and cut, the juice and grated rind of 2 lemons. Cook all together 1 hour, then add 4 lbs. sugar, some pieces of ginger root, and boil about half an hour, or until the sauce is clear and nearly jellied. This is very nice.

Grape Jelly.

Heat and crush the grapes in a kettle and cook until done; then drain through a sieve, but not press through. To each pt. of juice allow 1 lb. of heated sugar. Boil rapidly 5 minutes, then add sugar and boil 3 minutes longer.

Brandy Peaches.

1 lb. peaches, $\frac{1}{2}$ pound sugar. Dissolve the sugar in a little water. Put in your peaches, and when you can push a broom corn through them easily, take them off the fire and let them cool. Let the syrup cool, and add as much brandy as syrup. Seal them up tight.

Preserved Pears.

8 pounds sliced pears, 4 pounds granulated sugar, 1 oz. white ginger root, 4 sliced lemons. Soak ingredients together over night. Boil till clear.

Pickled Peaches.

Make syrup of 1 qt. vinegar and 6 lbs. sugar. Boil and skim, then add 1 ounce whole cloves. Pare 1 peck of ripe but not soft fruit. Boil in syrup till tender. This fills 6 quart jars.

Apple Ginger.

4 lbs. each of apples and sugar. Make a syrup of the sugar with a pint of water. Chop the apples very fine, with one oz. green ginger, or, if you cannot get that, use white ginger root. Put in the syrup with the grated rind of four lemons, and boil slowly 2 hours or until it looks clear.

Spiced Rhubarb. (Good.)

Peel and slice the rhubarb and weigh it. Put it in a porcelain kettle, and place where it will heat gradually until the juice flows freely. Bring forward on the stove and boil gently half an hour. Dip out half the juice and keep warm. Add to the cooked fruit $\frac{1}{2}$ lb. sugar for each lb. of rhubarb used, and also to each pound allow 1 teaspoonful cloves, and 2 cinnamon. If too thick, reduce with the warm juice. It should not be quite so thick as jam. Simmer for ten minutes and pour into glass jars. When cool, wrap each jar in thick paper. Keep in cool, dry place.

To Can Corn.

To 8 pints of cut corn add 3 pints of water and boil 20 minutes. Then add $\frac{3}{4}$ of a pint of table salt, and boil two or three minutes. Can immediately while boiling. It will keep a long time in glass cans. Sweet corn is the best. To prepare it soak or wash thoroughly till all the brine is out. Then season with butter, milk and pepper.

CONFECTIONS.

Kisses.

Beat the whites of 3 fresh eggs to a stiff froth, add 6 tablespoonfuls powdered sugar. Flavor with vanilla. Have ready a buttered pan, in which to lay a white paper, drop on with a teaspoon, and sift granulated sugar over them. Bake in a slow oven half an hour.

Glaze Nuts and Fruits.

Candy.

2 cups sugar, $\frac{1}{2}$ cup water, 2 teaspoonfuls vinegar, piece of butter the size of an egg. Don't stir after it melts. Pour in buttered pans, and cut in squares.

Butter Scotch.

2 cups brown sugar, 1 cup water, 2 even tablespoonfuls butter. Boil sugar and water till hard enough to break when tried in water; then add melted butter, and pour into a buttered dish. Do not stir while cooking.

Chocolate Creams.

Melt one square unsweetened chocolate with 1 teaspoonful water, add an equal quantity melted fondant, and in this mixture dip white balls of fondant flavored with vanilla. Cool on buttered paper. Be careful not to let the chocolate cook; it must melt only, and it is better to put it in a dish over the steam of the tea-kettle. To prepare the fondant.—Boil 2 cups granulated sugar and 1 scant cup boiling water, till it threads, when it can be gathered in a soft ball when dropped in ice water. When lukewarm, beat until thick enough to knead; work until smooth; knead in the hands by squeezing, pressing and rolling, till it looks and feels much like lard. Fondant makes an excellent frosting. A layer of chocolate over it makes a chocolate cream frosting which is delicious.

Chocolate Caramels.

1 cup sugar, 1 cup molasses, 1 cup chocolate, grated, 1 cup milk, $\frac{1}{2}$ cup butter, 1 teaspoonful vanilla. Boil briskly for 20 minutes. Pour in buttered pans; when cool mark off in squares.

Chocolate Caramels.

5 scant cups granulated sugar, $\frac{1}{2}$ lb. unsweetened chocolate, 1 cup cream or milk, and 3 tablespoonfuls butter. Boil all together twenty minutes, stirring meanwhile, then try in cold water; if it will crack it is done. If cooked a little longer it will be sugary.

Cream Peppermints.

Boil 2 cups granulated sugar and $\frac{1}{2}$ cup boiling water five minutes. Add a few drops oil of peppermint. Beat to a cream, and drop on buttered paper.

Checkermints are made in the same way, only colored pink with cochineal, and flavored with wintergreen.

For Chocolatemints, add a few drops of melted chocolate to the boiled sugar and water and flavor with vanilla.

Easy Candy.

The white of an egg, an equal quantity of water and confectioners' sugar. Put between walnuts, dates, etc.

Nut Meringues.

Beat whites of 3 eggs to a froth, add 1 saltspoonful cream of tartar, and continue beating until stiff. Add $\frac{3}{4}$ cupful powdered sugar and $\frac{1}{4}$ cupful chopped walnuts. Drop on buttered paper and bake in a very slow oven 30 minutes.

**DIRECTIONS FOR RESTORING PERSONS APPARENTLY
DEAD FROM DROWNING.**

Loosen all tight articles of clothing about the neck and chest. Remove the froth and mucus from the mouth and nostrils. Hold the body, *for a few seconds only*, with the head hanging down, so that the water may run out of the lungs and windpipe. See that the tongue is pulled forward if it falls back into the throat. By taking hold of it with a handkerchief it will not slip.

If breathing has ceased, or nearly so, it must be stimulated by pressure of the chest with the hands, in imitation of the natural breathing, forcibly expelling the air from the lungs and allowing it to re-enter and expand them by the elasticity of the ribs. This is the *most important step of all*. To do it readily, lay the person on his back with a cushion or some firm substance under his shoulders; then press with the flat of the hands over the lower part of the breast bone and the upper part of the abdomen, keeping up a regular repetition and relaxation of pressure twenty or thirty times a minute. A pressure of thirty pounds may be applied with safety to a grown person.

Rub the limbs with the hands or dry cloths constantly, to aid the circulation and keep the body warm. As soon as the person can swallow, give warm drink.

EMERGENCIES.

What shall we do before the Doctor arrives?

In the limited space the compiler of this useful little book has allowed me, I shall confine myself to suggestions on those diseases which frequently occur, the first and second in infancy and childhood, the latter in most cases between the ages of fifty and seventy.

There is probably no disease that so strikes terror to the heart of father and mother as croup. It often comes on suddenly with hoarseness and a short dry cough, which soon grows metallic or "brassy," and the difficulty of breathing quickly increases and is most distressing, the child seeming to fight for breath and to require all its strength to force the air in and out of its chest. The face is flushed, and the voice and breathing make a peculiar sound, which once heard is never forgotten.

Keep the child in a warm room and apply hot water compresses to the throat, changing them every ten minutes until medical aid arrives. Spasmodic croup is usually relieved in a short time. Membranous croup is of much more rare occurrence, but often fatal.

Convulsions is another disease which has usually a sudden onset, and is alarming to both family and physician. When convulsions occur send for a doctor at once. In the meantime seek to learn the cause of the attack, whether from disordered dentition, whooping cough, or indigestible matter in the stomach. If the latter, give the patient something to throw it off. Strong salt and water is usually effective, or add a little mustard to the water. If the child is feverish, put it in a hot bath, temperature of 100 degrees Fahrenheit. Do not trust to your hand to judge of the warmth of the water, lest in your haste and excitement you may put the child into too hot water, and scald the unconscious little patient. That very thing has been done.

While the child is in the bath, place a sponge or cloth wet in cold water on its head. The bath should last from ten minutes to half an hour. Then wrap the little one in warm flannel, and if the head is still hot, continue the cold applications. It is hoped by this time the physician has arrived to assume the burden of responsibility in the case.

Apoplexy is another grave disease which is accompanied with sudden loss of sense and motion, though the mechanical action of the heart and lungs still continues. A person attacked falls suddenly and lies without moving. Unconsciousness is usually complete for some seconds, minutes or hours. During the coma the breathing is commonly stertorous, and the pulse slow and full, the head hot, and the face more or less dark or flushed.

The most that can be done until the doctor comes is to place the patient in a semi-prone position, so the head will be raised. Relieve tension of all bands about the throat, chest and abdomen, and apply cold compresses to the head.

In all emergencies remember that common sense, combined with a clear, cool head, is of the first importance in both nurse and medical attendant. Little does it matter how great our knowledge if we cannot make good use of it when needed.

REMEDIES AND HEALTH HINTS.

For dust in the eyes avoid rubbing; dash water into them.

Remove cinders, etc., with the round point of a lead pencil.

If an artery is cut, compress above the wound; if a vein is cut, compress below.

If choked, get upon all fours and cough.

For light burns dip the part in cold water; if the skin is destroyed, cover with varnish.

Smother a fire with carpets; water will often spread burning oil, and increase the danger.

Before passing through smoke, take a full breath, and then stoop low; but if carbon is suspected, walk erect.

Suck poison wounds, unless your mouth is sore, enlarge the wound, or, better, cut out the part without delay. Hold the wounded part as long as can be borne to a hot coal or the end of a cigar.

For apoplexy, raise the head and body; for fainting, lay the person flat.

CULINARY HINTS.

There is a greenness in onions and potatoes that renders them hard to digest. For health's sake put them in warm water for an hour before cooking.

Single cream is cream that has stood on the milk twelve hours. It is best for tea and coffee. Double cream stands on its milk twenty-four hours, and cream for butter frequently stands forty-eight hours. Cream that is to be whipped should not be butter cream, lest in whipping it change to butter.

The only kind of stove with which you can preserve a uniform heat is a gas stove; with it you can simmer a pot for an hour, or boil at the same rate.

To beat the whites of eggs quickly, put in a pinch of salt. The cooler the eggs the quicker they will froth.

In boiling eggs, put them in boiling water ten minutes and then put them in cold water. This will prevent the yolks from turning black.

In making any sauce, put the butter and flour in together, and your sauce will never be lumpy.

Tepid water is produced by combining two-thirds cold and one-third boiling water.

To make macaroni tender, put it in cold water and bring to a boil.

Old potatoes may be freshened by plunging them into cold water before cooking them.

USEFUL HINTS.

Never leave the cover off the tea canister.

Clean piano keys with a soft cloth dipped in alcohol.

Egg stains on silver can be removed with table salt and a wet cloth.

Leather chair seats may be revived by rubbing them with well beaten white of egg.

Salts of lemon will take spots out of linen, and also remove stains from wood.

Never wash bronzed lamps, chandeliers, etc. Dust them with a soft woolen cloth.

A very thin coat of what is known as French picture varnish will restore chromos and oil paintings to their original brightness.

Hold a hot shovel over furniture to remove white spots.

Salt dissolved in alcohol will remove grease spots from cloth.

To extract ink from wood, scour with sand wet with water and ammonia, then rinse with strong saleratus water.

Mildew can be removed by soaking in buttermilk, or putting lemon juice and salt upon it and exposing it to the hot sun.

Take a bucket of fresh water into your bedroom every night, and let it remain uncovered. It will absorb all poisonous gases.

Paint stains that are dry and old may be removed from cotton or woolen goods with chloroform. First cover the spot with olive oil or butter.

Zinc is best cleaned with hot, soapy water, then polished with kerosene.

It is well to keep large pieces of charcoal in damp corners and dark places.

If the hands are rubbed on a stick of celery after peeling onions, the odor will be entirely removed.

Chloride of lime should be scattered at least once a week under sinks and in all places where sewer gas is liable to lurk.

The white of an egg is said to be a specific for fish bones sticking in the throat. It is to be swallowed whole, and will carry down a bone easily.

The metallic tops of kerosene lamps can be cleaned by soaking in water in which beans have been boiled.
